Hek MSHF Mastclimber

Year Mnfr - 1996

Capacity - up to 5000 Lbs

Platform length - 33 ft

240 Volt - 3 Phase

Lifting Speed - 23ft min

Choice of 6 units.

Completely restored, every nut and bolt, new cable, new control panel and every component checked, repaired, replaced or serviced.

The MSHFs ability to free stand to 66 ft outside or 99 ft inside on a mobile chassis, which can be moved with the mast in position, makes the MSHF the ideal access solution for façade, towers, and structures where anchoring is not an option or limited.

For added versatility, the MSHF can work up to 600ft in single or twin mast configurations, with anchors at 45 m intervals. With a capacity up to 8,800 lbs.
