### Hydro Mobile P Series Mast Climbing Work Platform x 8

Year of Manufacturer	2001	Power	Gasoline
Capacity	6,000lbs	Lifting Speed	10 ft/min
Platform length	28 ft	Platform Height	60 ft

The P-Series is the perfect tool for smaller jobs that require high capacity or for restrained work area where most platforms can't fit, whether for new construction or restoration. With its high load capacity (6,000 lbs at 28' length) to size ratio, it is ideal for multi-residential or small commercial masonry jobs between 15' and 100' in height.

The P-Series offers an attractive price/performance ratio. It is extremely portable and set up is both easy and very quick. In addition, it is adaptable to angle configurations and boasts a 10 feet per minute climbing rate. By reducing labor costs and set-up time, the P-Series can contribute to an estimated 30% increase in productivity.

Additional Bridges are available to make into twin units, up to 84 ft long.

These units are ready to go...
