

# INTRODUCTION TO MASTCLIMBERS

Mastclimbers LLC would like to offer you the very best service available. Rental or sales, we are confident we have the right machine for your project with over 180 units available, complete with various components and accessories. We want your business, we want to develop a working partnership where we can all provide an unbeatable service.

The Mastclimbers LLC team have been in the industry for over 20 years, our experience has taught us the importance of listening to what the customer wants, identifying what they need and supplying the right equipment.

As an independent company we look for solutions across the range of manufacturers, seeking the very best deals available. With our in house draughtsman and safety engineer we can layout your project in the most efficient and economical way, finding solutions for those areas that can cause problems. Identifying the systems to make your project cost effective and profitable.

As part of the IPAF PAL card training program, we offer the very best training available for operators, installers and demonstrators, making sure that your projects are covered.

The more mast climbing work platforms are used the more the variety of applications. New construction, refurbishment projects, industrial and shipyards have always been the staple diet of mastclimbers, but wind power generation projects, elevator installations, dam and chimney stack repair/ demolition, that have all been completed successfully using the flexible and economical mastclimber system.
